“Colorful” or wrong tooltips for buttons in “3D Effects” dialog

“3D Effects” dialog, tabs: “Illumination” and “Material” (v. screenshots on the next page).

Two buttons in “Illumination” tab and three buttons in “Material” tab (all 5 with the same icon) have wrong tooltip, be it extended or not.

I. Extended tooltips are OFF

Tooltip reads: “Colors Dialog”.

On a point of order: word “Dialog” should have its first letter in lower case (to maintain uniformity across AOO components).

Far more importantly: the title of dialog this tooltip refers to is: “Color Picker” not “Colors”.

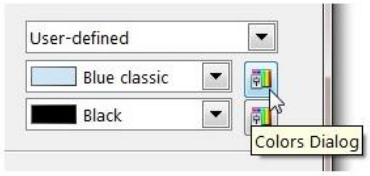
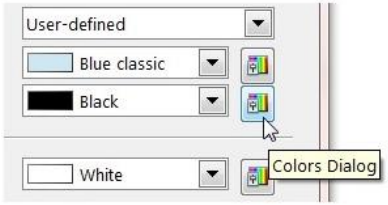
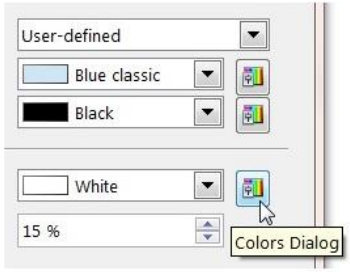
'3D Effects' dialog, 'Material' tab







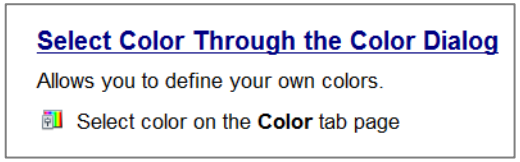
Relevant entries in AOO Help cause additional confusion (see screenshots on the bottom right).

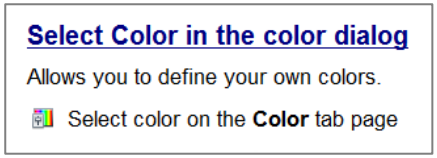
The entry “Select color on the **Color** tab page” begs a vital question: where is “the Color tab page” in “3D Effects” dialog?

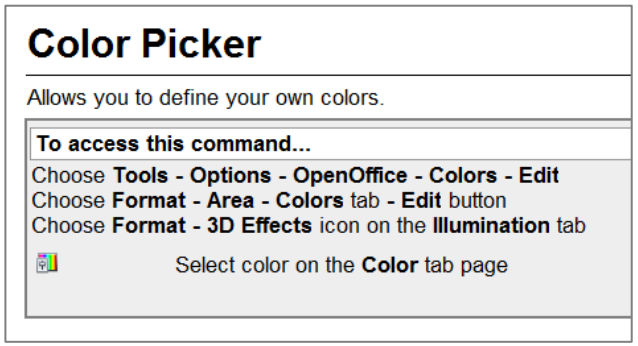
Another entry reads: “**Select Color Through the Color Dialog**”. Tooltip reads: “Colors Dialog” not “Color Dialog”. Hyperlinks directs to Help entry “Color Picker” that kind of explains the mish-mash. In Format > Area >“Colors” tab, “Edit” button invokes “Color Picker” dialog.

That dialog is also available via “Tools > Options > OpenOffice > Colors”, “Edit” button.

(See, please, relevant screenshots on the next two pages)







Next question would be: How to understand “Choose **Format – 3D Effects** icon on the **Illumination** tab”?

II. Extended tooltips are ON

Illumination tab:
Tooltips for two buttons are wrong (one somehow "inherits" tooltip from other list box; one i.e. "Colors Dialog" uses wrong name of dialog (cf. point I.)).

Material tab:
Tooltips for 3 buttons are wrong (somehow "inherited" from list boxes located in lower rows of dialog).

See, please, the juxtaposition of screenshots on the next page. The table on the right provides relevant information too.

	TOOLTIP	
	List box	**Button**
"Illumination" tab		
Light source	Select a color for the current light source.	Select a color for the ambient light.
Ambient light	Select a color for the ambient light.	Colors Dialog
"Material" tab		
Object color	Select the color that you want to apply to the object.	Select the color to illuminate the object.
Illumination color	Select the color to illuminate the object.	Select the color that you want the object to reflect.
Color	Select the color that you want the object to reflect.	Enter the intensity of the specular effect.
